

Neogloves

about

Neogloves

Neogloves is a high quality range of medical gloves that consists of Latex and Non-Latex, Powder and Powder-free and Sterile and Non-sterile gloves. All Neogloves possess the following features:

- **Barrier Protection**

All Neogloves are manufactured to the highest ASTM and EN standards and have a maximum AQL of 1.5. This translates into a strong, robust and highly tear-resistant glove that affords the user the highest levels of barrier protection at all times.

- **Powder and Powder-Free; Latex and Latex Free**

Whilst all Neogloves powdered gloves are manufactured to ensure the lowest levels of latex proteins, the Neogloves range also includes Powder-free gloves with lower protein levels.

For those not wishing to use Latex gloves at all; Neogloves offers synthetic (Nitrile) gloves in both Powdered and Powder-free forms.

- **Comfort and Usability**

All Neogloves are manufactured to ensure that they are comfortable to wear and in the case of Surgical Gloves, the gloves are anatomically shaped for greater comfort.

Furthermore all Neogloves can be specified with smooth or micro-textured surfaces for extra sensitivity or grip.

The hallmark of all Neomedic products is carried through to the Neogloves range in that all non-sterile gloves are coloured by size and all sterile gloves are colour coded by type. In addition to which, all Neogloves carry clear and innovatively designed user instructions.

All Neogloves products conform to ASTM D 3577/3578 and EN 455 (part 1 & 2) and are ISO 9002, EN 46002 and CE Certified.

The Neogloves range therefore offers a wide range of gloves to suit most requirements, packed in Neomedic's unique form of highly presentable and informative packaging.

The overriding aim of Neomedic is to continue to maximize customer value through an unrelenting push for quality that meets our stated benchmarks and exceeds our customer's expectations.

We must at all times demonstrate a commitment to quality in each of the following fields:

Commitment to a Quality Product:

- By understanding our ethical responsibilities as vendors of medical products.
- By selecting and selling products that meet recognised quality benchmarks in each of their fields.
- By accepting that our actions have a direct effect on human lives.

Commitment to a Quality Service:

- By understanding that there are certain minimum standards for the quality of communication in terms of tone, content and feedback that all our customers have a right to expect from us.
- By acknowledging and answering all customers communication on the day it is received.
- By ensuring that all orders are delivered on time or by providing valid reasons for failing to do so.

Commitment to a Competitive Price:

- By ensuring that our prices are most competitive for products of equivalent quality.
- By re-iterating our commitment to better healthcare through ethical pricing.

By committing ourselves to these quality statements we will achieve our simple aim of building a strong company that adds value to every transaction.

Latex & Nitrile

Sterile

Neogloves

Latex Examination Gloves

Neogloves Latex Examination gloves are manufactured from premium quality, natural rubber latex and are pre-powdered with low protein absorbable using powder USP. Neogloves Latex Examination gloves incorporate the following functional features:

- Smooth surface, allows for increased sensitivity to touch and greater feel.
- Premium quality latex for extra strength and barrier protection against infections and viruses.
- Lightly powdered for ease of donning.
- Low protein content.
- Beaded cuff and ergonomic design for added strength, comfort and ease of use.

Latex P

Sterile Latex Surgical Gloves

Neogloves Sterile Latex Surgical gloves are manufactured from premium quality, natural rubber latex. Neogloves Sterile Latex Surgical gloves incorporate the following functional features:

- Microtextured surface for better grip and control.
- Premium quality latex for extra strength and barrier protection against infections and viruses.
- Lightly powdered with absorbable dusting powder USP. Excess powder can be removed using a sterile sponge.
- Anatomically shaped with long cuff for greater comfort and protection.

Sterile Late

Powder-free Examination Gloves

Neogloves Latex Powder-free Examination gloves are manufactured from premium quality, natural rubber latex and are free of powder thus reducing the risk of sensitivity arising from the presence of soluble proteins. Neogloves Latex Powder-free Examination gloves incorporate the following functional features:

- Microtextured surface for better grip and control.
- Premium quality latex for extra strength and barrier protection against infections and viruses.
- Powder-free glove results in lower protein count and lower risk of skin allergy
- Beaded cuff and ergonomic design for added strength, comfort and ease of use.

Nitrile Ex

Neogloves Nitrile Ex are manufactured from synthetic Nitrile and with low protein absorption powder USP. Neogloves Examination gloves incorporate the following functional features:

- Smooth surface, increased sensitivity and greater feel.
- Premium quality strength and barrier against infections.
- Lightly powdered for easy donning.
- Low protein content.
- Beaded cuff and ergonomic design for added strength, comfort and ease of use.

Powder-free Surgical Gloves

Neogloves Sterile Latex Powder-free Surgical gloves are manufactured from premium quality, natural rubber latex. Neogloves Sterile Latex Powder-free Surgical gloves incorporate the following functional features:

- Microtextured surface for better grip and control.
- Premium quality latex for extra strength and barrier protection against infections and viruses.
- Powder-free glove results in lower protein count and lower risk of skin allergy.
- Anatomically shaped with long cuff for greater comfort and protection.

Sterile Latex Ex

Neogloves Sterile Latex gloves are manufactured from premium quality, natural rubber latex. Neogloves Sterile Latex Examination gloves incorporate the following functional features:

- Microtextured surface for better grip and control.
- Premium quality strength and barrier against infections.
- Lightly powdered with dusting powder USP. The powder can be removed with a sterile sponge.
- Beaded cuff and ergonomic design for added strength, comfort and ease of use.

Examination Gloves

Examination gloves are made from premium quality nitrile. They are pre-powdered and available using a variety of sizes. Neogloves Nitrile gloves incorporate the following features:

• Beaded cuff for added strength and comfort and ease of use.

• Microtextured surface for better grip and control.

• Premium quality nitrile for extra strength and barrier protection against infections and viruses.

• Powder-free glove results in lower protein count and lower risk of skin allergy.

• Beaded cuff and ergonomic design for added strength, comfort and ease of use.

Nitrile Powder-free Examination Gloves

Neogloves Nitrile Powder-free Examination gloves are manufactured from premium quality synthetic Nitrile and free of powder thus reducing the risk of sensitivity arising from the presence of soluble proteins. Neogloves Nitrile Powder-free Examination gloves incorporate the following functional features:

- Microtextured surface for better grip and control.
- Premium quality Nitrile for extra strength and barrier protection against infections and viruses.
- Powder-free glove results in lower protein count and lower risk of skin allergy.
- Beaded cuff and ergonomic design for added strength, comfort and ease of use.

Examination Gloves

Neogloves Sterile Latex Powder-free Examination gloves are manufactured from premium quality, natural rubber latex. Neogloves Sterile Latex Powder-free Examination gloves incorporate the following functional features:

• Microtextured surface for better grip and control.

• Premium quality latex for extra strength and barrier protection against infections and viruses.

• Powder-free glove results in lower protein count and lower risk of skin allergy.

• Beaded cuff and ergonomic design for added strength, comfort and ease of use.

Sterile Latex Powder-free Examination Gloves

Neogloves Sterile Latex Powder-free Examination gloves are manufactured from premium quality, natural rubber latex. Neogloves Sterile Latex Powder-free Examination gloves incorporate the following functional features:

- Microtextured surface for better grip and control.
- Premium quality latex for extra strength and barrier protection against infections and viruses.
