about Neomedic L I M I T E D

The overriding aim of Neomedic is to continue to maximize customer value through an unrelenting push for quality that meets our stated benchmarks and exceeds our customer's expectations.

We must at all times demonstrate a commitment to quality in each of the following fields:

Commitment to a Quality Product:

- By understanding our ethical responsibilities as vendors of medical products.
- By selecting and selling products that meet recognised quality benchmarks in each of their fields.
- By accepting that our actions have a direct effect on human lives.

Commitment to a Quality Service:

- By understanding that there are certain minimum standards for the quality of communication in terms of tone, content and feedback that all our customers have a right to expect from us.
- By acknowledging and answering all customers communication on the day it is received.
- By ensuring that all orders are delivered on time or by providing valid reasons for failing to do so.

Commitment to a Competitive Price:

- By ensuring that our prices are most competitive for products of equivalent quality.
- By re-iterating our commitment to better healthcare through ethical pricing.

By committing ourselves to these quality statements we will achieve our simple aim of building a strong company that adds value to every transaction.

about Neoject

Neoject is Neomedic Limited's flagship range of disposable syringes and needles. Using the finest quality materials we aim to offer a precise, safe and relatively painless syringe and needle combination.

Neoject Disposable Syringes come in sizes from 1ml to 50ml and clients are offered a choice of luer lock, slip tip, eccentric tip or catheter tips for the appropriate syringe size, thus ensuring a bespoke solution for each syringe usage scenario.

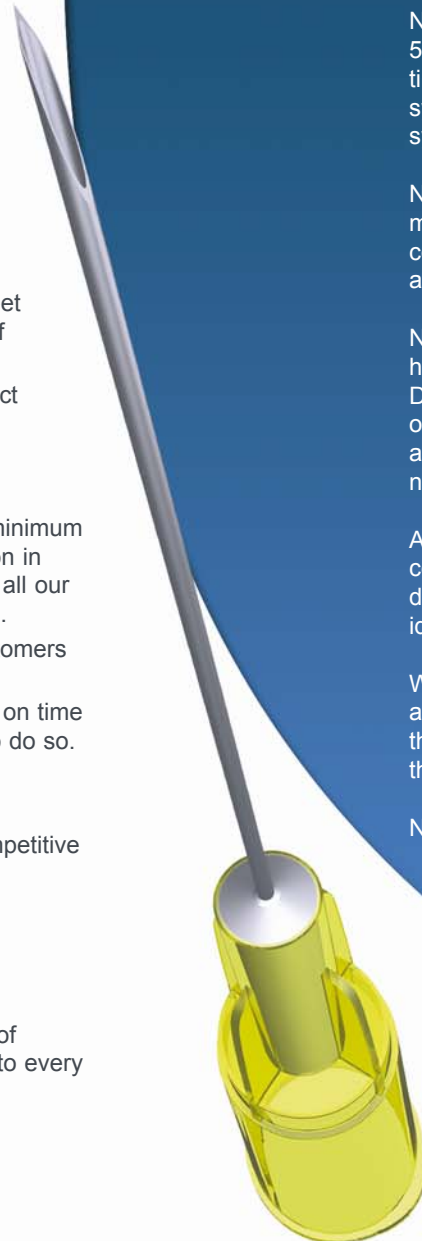

Neoject Disposable Syringes come with our without mounted needles for ease of use and are packed in colour coded boxes that make size identification simple and straightforward.

Neoject Disposable Needles are manufactured using high quality, polished stainless steel. All Neoject Disposable Needles feature acute angle needle tips in order to minimise pain on entry and are polished using a 35-step ultrasonic method. This ensures a smooth needle surface and tip free from any imperfections.

All Neoject Disposable Needle hubs and boxes are colour coded to comply with ISO guidelines for disposable needles and this makes for easy identification of the relevant needle size.

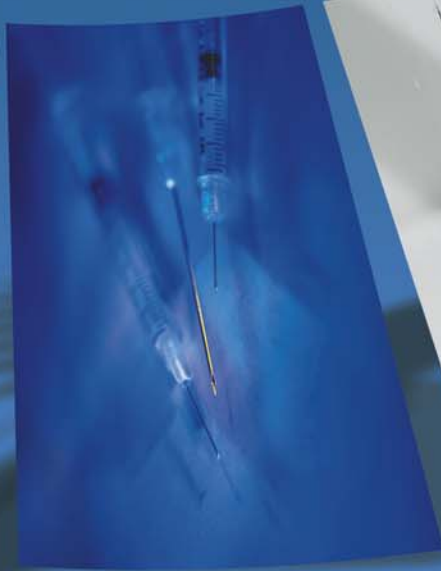

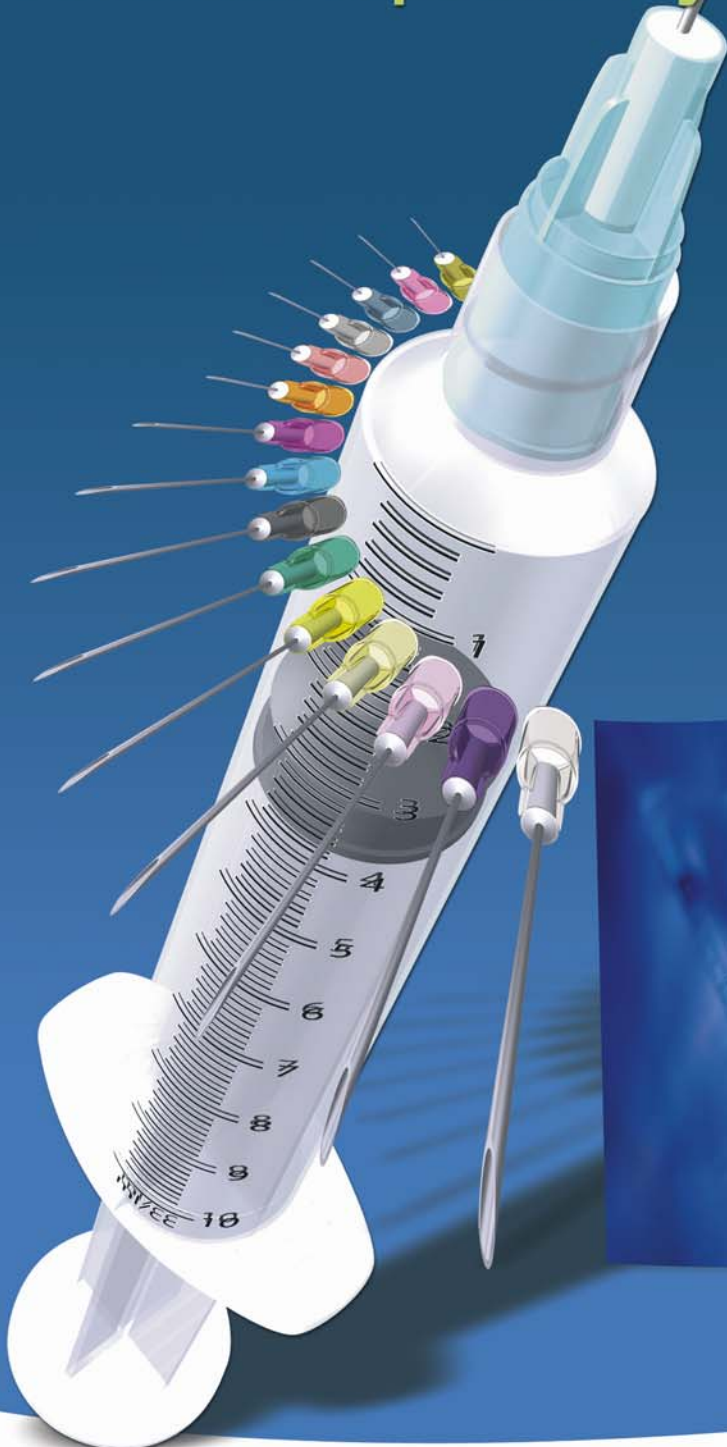

With safety and accuracy in mind, all Neoject syringes are three part syringes with separate dual lock gaskets thus ensuring that there is no leakage of solution from the syringe nor any air passing into the syringe.

Neoject Disposable Syringes and Needles; a safe, precise and painless solution to the administration and delivery of injectables.
